EDUCATION

GRAPHIC ERA UNIVERSITY Dehradun, India	2023 – 2025
Master of Computer Applications CGPA: 7.4	
GRAPHIC ERA UNIVERSITY Dehradun, India	2020 – 2023
Bachelor of Science in Information Technology CGPA:7.6	

SKILLS SUMMARY

- **Programming & Databases:** Python, SQL, PostgreSQL, SQLAlchemy (Async)
- **GenAI & LLMs:** LangGraph, LangChain, LangSmith, Adv RAG, Tool Calling, MCP, LLM Agents, Claude Code
- **ML / DL:** Scikit-Learn, TensorFlow, LSTM, Transformers, PyTorch
- **NLP & AI Techniques:** NLP Pipelines, Embeddings, Transfer Learning
- **Data & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Grafana, Excel
- **MLOPs & Infrastructure:** Docker, MLflow, FastAPI, AWS, Redis, CI/CD (GitHub Actions)
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, PyCharm

PROJECTS

Agentic AI Assistant with MCP Integration | [GitHub](#) | [Demo](#)

Tech Stack: Python, LangGraph, LangSmith, FastAPI, MCP, Groq, Ollama, SQLite, DuckDuckGo Search, APIs

- Built an Agentic AI Assistant using LangGraph and MCP, integrating 7+ tools for expense management, web search, stock analysis, weather, and local events.
- Developed custom MCP servers with SQLite and remote MCP integrations, enabling autonomous tool execution through natural language.
- Integrated LangSmith, Groq, and Ollama for agent observability, workflow tracing, and improved debugging efficiency by ~60%.

Agentic Blogger | [GitHub](#) | [Demo](#)

Tech Stack: Python, LangGraph, LangChain, Google Gemini API, Streamlit, Ollama, Tavily Search API, SQLite

- Built a multi-agent AI blog writer using LangGraph with Planner, Researcher, Orchestrator, and Writer agents, automating 80%+ of content creation.
- Integrated web search, tool calling, citations, and SQLite-based persistent memory for context-aware blog generation.
- Built a Streamlit dashboard with workflow tracking and Markdown export, reducing content creation time by ~75%.

Multimodal AI System | [Live](#) | [GitHub](#) | [Demo](#)

Tech Stack: Python, LangChain, Streamlit, Chroma DB, Google Gemini (LLM), LangGraph, Embeddings

- Built and deployed a Multimodal RAG platform for querying YouTube videos, PDFs, and documents, indexing 1,000+ chunks for semantic retrieval.
- Implemented a **Corrective RAG (CRAG) pipeline** with embeddings, vector search, and retrieval validation, improving response accuracy by ~30%.
- Developed a LangGraph-based query router that dynamically selects knowledge sources, improving answer relevance by ~25%.

EXPERIENCE

Data Analytics Intern Infyntrek Systèmes Certificate	Sep 2025-Dec 2025
• Performed data cleaning, trend analysis, and feature engineering for analytics tasks. • Built ML models for classification and forecasting using Python and SQL. • Created dashboards and insights using visualization tools to support business decisions.	

CERTIFICATES

Introduction to Data Analyst (IBM) | [Certificate](#) || FastAPI for Machine Learning (Campus X) | [Certificate](#)
