

Rohit Kumar Yadav

Uttarakhand (Dehradun)

rohitrana2332000@gmail.com | +91-8126380717 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Entry-level GenAI Engineer specializing in agentic AI systems, RAG pipelines, and LLM tool orchestration using LangGraph, MCP, and modern LLMops practices. Experienced in building and deploying end-to-end AI products from prototype to production.

EDUCATION

Graphic Era University

Master of Computer Applications | CGPA: 7.4

Dehradun, India | 2023 – 2025

Graphic Era University

Bachelor of Science in Information Technology | CGPA: 7.6

Dehradun, India | 2020 – 2023

SKILLS SUMMARY

- **Programming & Databases:** Python, SQL, PostgreSQL, SQLAlchemy (Async)
- **GenAI & LLMs:** LangGraph, LangChain, AWS Bedrock, Advanced RAG, Tool Calling, MCP, LLM Agents
- **LLMOps & Evaluation:** LangSmith, DeepEval, Prompt Evaluation, RAG Evaluation
- **ML / DL:** Scikit-Learn, TensorFlow, PyTorch, Transformers, Hugging Face, LLaMA, LLM Fine-Tuning
- **NLP & Retrieval:** NLP Pipelines, Embeddings, Semantic Search, ChromaDB, FAISS, Vector Databases
- **Data & Visualization:** Pandas, NumPy, Matplotlib, Power BI
- **MLOps & Infrastructure:** Docker, Kubernetes, MLflow, AWS (EC2, S3), Redis, GitHub Actions (CI/CD), Render
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, PyCharm, Grafana
- **Backend & APIs:** FastAPI, Pydantic, REST APIs, JWT Authentication

PROJECTS

Agentic AI Assistant with MCP Integration | [GitHub](#) | [Demo](#)

Tech Stack: Python, LangGraph, LangSmith, FastAPI, MCP, Groq, Ollama, PostgreSQL, Docker, APIs

- Designed and deployed a multi-agent assistant using LangGraph orchestration, enabling autonomous execution across 7 tools (expense tracking, web search, stock analysis, weather, local events) via natural-language commands.
- Built 2 custom MCP servers (SQLite-backed) plus remote MCP integrations, extending the agent's tool-calling scope beyond a single API without hardcoding logic per tool.
- Instrumented the agent with LangSmith tracing across all tool calls, cutting average debugging time per incident from ~25 min to ~10 min by surfacing failure points in the reasoning chain instead of raw logs.

Multimodal AI System | [Live](#) | [GitHub](#) | [Demo](#)

Tech Stack: Python, LangChain, Streamlit, Chroma DB, Google Gemini (LLM), LangGraph, Embeddings

- Designed and deployed a multimodal RAG platform enabling natural-language querying across YouTube videos, PDFs, and documents, indexing 1,000+ chunks for semantic retrieval.
- Built a Corrective RAG (CRAG) pipeline that validates retrieved chunks before generation, reducing irrelevant/hallucinated answers by ~30% compared to a baseline retrieval-only setup.
- Built a LangGraph query router that dynamically selects the correct knowledge source (video transcript vs. PDF vs. doc) per query, reducing off-source answers by ~25%.

Agentic Trip Planning System | [Live](#) | [GitHub](#) | [Demo](#)

Tech Stack: Python, LangGraph, FastAPI, Streamlit, Groq, LangSmith, SQLite, Geoapify, Tavily, Render

- Built and deployed a multi-agent trip-planning system that generates personalized multi-day itineraries from user preferences, budget, interests, and dates using LangGraph-orchestrated Groq LLM agents.
- Connected 4 external APIs (Geoapify, weather, hotels, transportation) into a single agent pipeline, replacing manual multi-tab research with one natural-language request.
- Added persistent trip history, Markdown export, and LangSmith monitoring for production latency/failure tracking.

EXPERIENCE

Data Analytics Intern | [Infyntrek Systèmes](#) | [Certificate](#)

Sep 2025 – Dec 2025

- Performed data preprocessing, feature engineering, and EDA using Python and SQL for scalable ML pipelines.
- Built, trained, and evaluated Machine Learning and Deep Learning models with Scikit-Learn and TensorFlow, applying model evaluation techniques to achieve accurate and reliable predictive performance.

HACKATHONS

- Participated in HackerRank Orchestrate, June 2026, building and presenting an AI agent in a 24-hour hackathon.
- Built RecruitRankAI for the INDIA.RUNS AI Challenge by Redrob, leveraging Sentence Transformers, FAISS, and hybrid ranking to generate explainable Top-100 candidate recommendations under CPU-only, offline, and no-LLM competition constraints.

CERTIFICATES

- MCP Advanced Topics (Anthropic) | [Certificate](#)
- FastAPI for Machine Learning (Campus X) | [Certificate](#)
- AI Primer Certification (Infosys) | [Certificate](#)
- Principles of Generative AI Certification (Infosys) | [Certificate](#)
