EDUCATION

GRAPHIC ERA UNIVERSITY Dehradun, India Master of Computer Applications CGPA: 7.6	2023 – 2025
GRAPHIC ERA UNIVERSITY Dehradun, India Bachelor of Science in Information Technology CGPA: 7.4	2020 – 2023

SKILLS SUMMARY

- **Languages :** Python, JAVA, SQL
- **Frameworks :** Pandas, Numpy, Scikit-Learn, Matplotlib, Seaborn, Plotly, TensorFlow, Keras, OpenCV
- **Tools :** MySQL, SQLite, Power BI, Excel, PowerPoint, Tableau, AWS, Docker
- **Platforms :** Pycharm, Jupyter Notebook, Visual Studio Code
- **Soft Skills:** Problem-Solving, Adaptability, Team Collaboration, Critical Thinking

PROJECTS

MOVIE RECOMMENDATION SYSTEM | [LINK](#) :

- Built a content-based Movie Recommendation System using Python, Pandas, NumPy, and CountVectorizer for feature extraction.
- Applied vectorization and cosine similarity techniques to compute and recommend the top 5 similar movies.
- Worked with a structured movie dataset to train and evaluate the model for accurate and scalable recommendations.

OLYMPIC DATA ANALYSIS WEB APP | [LINK](#) :

- Developed an interactive data visualization project that analyzed 100,000+ data points, improving trend analysis by 30%.
- Interactive data visualization dashboard using Matplotlib, Seaborn, Plotly, and Pandas.
- Built a Streamlit-powered web app for real-time data exploration.

Email Spam Classifier | [LINK](#) :

- Cleaned and preprocessed over 5,000 email samples, performing EDA and applying text processing techniques (tokenization, stopword removal, TF-IDF vectorization).
- Built a Support Vector Machine (SVM) model that achieved ~95% accuracy in classifying spam vs. non-spam emails.
- Evaluated performance using precision, recall, F1-score, and improved model by tuning hyperparameters, reducing false positives by ~15%.

EXPERIENCE

- Worked on various diverse datasets, performing end-to-end data preprocessing, including data cleaning, feature extraction, and feature selection for various ML and deep learning projects.
- Built and evaluated models using supervised and unsupervised learning techniques with tools like scikit-learn, TensorFlow, and Keras.

CERTIFICATES

Introduction to Data Analyst (IBM) | [Certificate](#)

- Learned about the data ecosystem, including big data basics and the ETL process, and developed skills in data gathering, identification, and cleaning for analysis preparation.

Principles of Generative AI Certification (INFOSYS | springboard) | [Certificate](#)

- Gained theoretical understanding of Generative AI, including core concepts like transformers, large language models (LLMs), diffusion models, and the architecture.

Artificial Intelligence Primer Certification (INFOSYS | springboard) | [Certificate](#)

- covering foundational concepts of AI, machine learning, and real-world applications.
